

# Specialty Guideline Management

## Olumiant

### Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Olumiant	baricitinib

### Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

#### FDA-approved Indications<sup>1</sup>

- Adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response to one or more tumor necrosis factor (TNF) blockers
- Coronavirus disease 2019 (COVID-19) in hospitalized adults requiring supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO)
- Adult patients with severe alopecia areata

Note: The criteria outlined in this policy is only applicable to coverage in the outpatient setting. Hospitalized members receiving Olumiant for the treatment of COVID-19 will be managed according to the member's inpatient benefit.

All other indications are considered experimental/investigational and not medically necessary.

Reference number(s)
2597-A

## Documentation

Submission of the following information is necessary to initiate the prior authorization review:

### Rheumatoid arthritis (RA)

#### Initial requests

Chart notes, medical record documentation, or claims history supporting previous medications tried (if applicable), including response to therapy. If therapy is not advisable, documentation of clinical reason to avoid therapy.

#### Continuation requests

Chart notes or medical record documentation supporting positive clinical response.

### Alopecia areata

#### Initial requests

- Chart notes, medical record documentation, or claims history supporting previous medications tried (if applicable).
- Chart notes or medical record documentation supporting at least 50% scalp hair loss (e.g., Severity of Alopecia Tool [SALT] score of 50 or higher) (if applicable).

#### Continuation requests

Chart notes or medical record documentation supporting positive clinical response (e.g., increased scalp hair coverage, 80% total scalp hair coverage [SALT score of 20 or less]).

## Prescriber Specialties

This medication must be prescribed by or in consultation with one of the following:

- Rheumatoid arthritis: rheumatologist
- Alopecia areata: dermatologist

## Coverage Criteria

### Rheumatoid arthritis (RA)<sup>1,3,4</sup>

Reference number(s)
2597-A

Authorization of 12 months may be granted for adult members for treatment of moderately to severely active rheumatoid arthritis (RA) when the member has had an inadequate response, intolerance, or has a contraindication to at least one tumor necrosis factor (TNF) inhibitor.

## Alopecia areata<sup>1,5,6</sup>

Authorization of 12 months may be granted for adult members who have previously received a targeted synthetic drug (e.g., Leqselvi, Litfulo) indicated for treatment of severe alopecia areata in the past year.

Authorization of 12 months may be granted for adult members for treatment of severe alopecia areata when both of the following criteria are met:

- Member has at least 50% scalp hair loss (e.g., Severity of Alopecia Tool [SALT] score of 50 or higher).
- Other forms of alopecia have been ruled out (e.g., androgenetic alopecia, trichotillomania, telogen effluvium, chemotherapy-induced hair loss, tinea capitis).

## Continuation of Therapy

### Rheumatoid arthritis (RA)<sup>1,3,4</sup>

Authorization of 12 months may be granted for all adult members (including new members) who are using the requested medication for moderately to severely active RA and who achieve or maintain a positive clinical response as evidenced by disease activity improvement of at least 20% from baseline in tender joint count, swollen joint count, pain, or disability.

### Alopecia areata<sup>1,5</sup>

Authorization of 12 months may be granted for all adult members (including new members) who are using the requested medication for severe alopecia areata and who achieve or maintain a positive clinical response as evidenced by an improvement in signs and symptoms of the condition from baseline (e.g., increased scalp hair coverage, 80% total scalp hair coverage [SALT score of 20 or less]).

## Other<sup>1,2</sup>

For all indications: Member has had a documented negative tuberculosis (TB) test (which can include a tuberculosis skin test [TST] or an interferon-release assay [IGRA]) within 12 months of initiating therapy for persons who are naïve to biologic drugs or targeted synthetic drugs associated with an increased risk of TB.

Reference number(s)
2597-A

If the screening testing for TB is positive, there must be further testing to confirm there is no active disease (e.g., chest x-ray). Do not administer the requested medication to members with active TB infection. If there is latent disease, TB treatment must be started before initiation of the requested medication.

For all indications: Member cannot use the requested medication concomitantly with any other biologic drug, targeted synthetic drug, or potent immunosuppressant such as azathioprine or cyclosporine.

## Dosage and Administration

Approvals may be subject to dosing limits in accordance with FDA-approved labeling, accepted compendia, and/or evidence-based practice guidelines.
