INTRODUCTION

Blue Cross and Blue Shield Federal Employee Program® is pleased to provide the 2026 *FEP Blue Focus® Drug Formulary* as a useful reference for drug product selection. The drugs on the *FEP Blue Focus Drug Formulary* have been reviewed by the FEP Pharmacy and Medical Policy Committee and FEP physicians and pharmacists and found appropriate for preferred status. This document is not intended for those enrolled in the FEP Medicare Prescription Drug Program (MPDP).

All the information in the *FEP Blue Focus Drug Formulary* is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

PREFACE

The formulary is organized by sections, which refer to either a drug class or disease state. All dosage forms and strengths of each drug are listed in the formulary, except where an exception is noted.

The *FEP Blue Focus Drug Formulary* is a closed formulary that does not cover all FDA-approved drugs. In addition, over-the-counter (**OTC**) products, with the exception of insulin and diabetes monitoring products, are generally not included in the pharmacy benefit. Some OTC products are listed in the formulary for informational purposes only.

The formulary is separated by Tiers in the following manner:

TIER	DEFINITION
Tier 1	Preferred Generic Drugs
Tier 2	Preferred Brand Drugs, Preferred Generic Specialty Drugs, Preferred Brand Specialty Drugs

The costs of drugs vary. How much you pay for a drug is your cost share. Look for your drug in the formulary, the tier level where your drug is listed determines your cost share. You can find details on the cost shares associated with the different tiers on the 2026 FEP Blue Focus Drug Formulary at fepblue.org.

All drugs that are Preferred are noted in their respective tiers of the drug lists throughout this formulary. Drugs may be reviewed by the FEP Pharmacy and Medical Policy Committee and designated Non-preferred. FEP may designate certain drugs as non-preferred, typically if the cost-effectiveness is less than other similar drugs.

PRIOR APPROVAL

Prior approval (**PA**) is required for certain drugs before FEP will cover them. The prescribing physician may request PA by calling toll-free 1-877-727-3784. The list of prior approval medications is subject to change. For a current list of medications that require prior approval please see our **Prior Approval** web page.

QUANTITY LIMITATIONS

Quantity limitations (**QL**) have been established for some of the medications covered by FEP. Requests for quantities greater than allowed can be submitted to the Prior Approval program by the prescribing physician by calling toll-free 1-877-727-3784. The list of medications that have quantity limitations is subject to change. For a current list of medications with quantity limitations please see our Prior Approval web page.

PHARMACY AND MEDICAL POLICY COMMITTEE

The role of the FEP Pharmacy and Medical Policy Committee includes evaluating new medications and making recommendations for the designation of preferred or non-preferred status on the *FEP Blue Focus Drug Formulary*. The FEP Pharmacy and Medical Policy Committee is made up of physicians and pharmacists who are not employees or agents of, nor have financial interest in FEP.

PRODUCT SELECTION CRITERIA

The FEP Pharmacy and Medical Policy Committee will consider U.S. Food and Drug Administration (FDA) approved drugs for preferred status designation. The evaluation includes a literature review; expert opinion may also be sought. Formal reviews are prepared that typically address the following information:

- Safety
- Efficacy
- Comparison studies
- Drug interactions
- Approved indications
- Formulation and administration
- Adverse effects
- Contraindications
- Pharmacokinetics
- Patient compliance considerations
- Medical outcome and pharmacoeconomic studies

When a new drug is considered for Preferred status, an attempt will be made to examine the drug relative to similar drugs currently preferred. In addition, entire therapeutic classes are periodically reviewed. The class review process may result in a designation of non-preferred status to drug(s) in a particular therapeutic class, in an effort to continually promote the most clinically useful and cost-effective agents.

Drugs evaluated by the Pharmacy and Medical Policy Committee and not classified as preferred to receive a non-preferred designation in the *FEP Blue Focus Drug Formulary.* This designation indicates the Pharmacy and Medical Policy Committee's belief that the drug offers no important clinical or cost advantage over comparable preferred drugs, or that there is currently insufficient information to determine its appropriate clinical role, or that questions remain regarding safety and effectiveness. In an open formulary environment, Non-preferred drugs are covered under FEP's pharmacy benefit. However,

there may be additional costs incurred by the patient to receive a Non-preferred medication. Physicians are encouraged to prescribe preferred drugs.

All the information in the *FEP Blue Focus Drug Formulary* is provided as a reference for drug therapy selection. The final choice of a specific drug selection for an individual patient rests solely with the prescriber.

GENERIC SUBSTITUTION

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the FDA for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and to the same extent as the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.
