*This medication is managed under the medical benefit because of the way it is administered and/or other unique characteristics. **Specialty Guideline Management review performed by Medical Director. †Patient-specific dosing limits. ††The initial limit is zero. All requests for this drug and strength will be considered through post-limit prior authorization. §This drug is indicated for short-term acute use; therefore, the 30-day limit will be the same as the 90-day limit. The initial quantity limit for codeine will be set at a quantity that corresponds to a 7-day supply. The post-limit quantity will be set at a quantity that corresponds to a 14-day supply.

Quantity Limits
The drugs listed below have limits based on U.S. Food and Drug Administration (FDA)-approved prescribing information, approved medical guidelines and/or the average utilization quantity for the drugs.

The limits listed below affect only the amount of medication that the prescription benefit plan pays for, not whether you can get a greater quantity. The final decision about the amount of medication you receive remains between you and your doctor.

Note: Some of the quantity limits have a prior authorization available if you exceed the drug's limit. Those drugs with a prior authorization available are noted in chart below. If your doctor has determined that a greater amount is appropriate, your **doctor** should call CVS Caremark at **1-800-294-5979** to request prior authorization for a larger quantity. The prior authorization line is for your doctor's use only.
