

Have old or unused medication?

We'll help you get rid of it safely.

CVS Caremark® is fully committed to providing solutions to help fight the national opioid abuse epidemic. That's why we created the Medication Disposal for Safer Communities Program. Our program helps prevent poisonings and stops misuse of leftover prescriptions by offering a safe, easy way to discard them. Your employer supports our commitment to fighting this growing problem and we invite you to support our efforts, too.

Simple and convenient medication disposal:

Use postage-paid Environmental Return System envelopes available at any CVS Pharmacy® location. They provide a secure, environmentally safe way to get rid of unused medication anytime.

Find safe, year-round medication disposal sites including CVS Pharmacy locations and law enforcement agencies at [CVS.com/content/safer-communities-locate](https://www.cvs.com/content/safer-communities-locate).

Supporting a national effort.

Since 2014, CVS pharmacies have participated in more than 800

National Prescription Drug Take-Back Day events by hosting collection sites in hundreds of local communities.
