INTRODUCTION

We are pleased to provide the 2023 Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® as a useful reference and informational tool. The Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® is reflective of current medical practice as of the date of review.

The information contained in this Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at https://www.ahrq.gov/gam/, on the websites listed under each therapeutic class and on the sites listed in the WEBSITES section of this publication.

PREFACE

The Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless exceptions are noted, generally all applicable dosage forms and strengths of the drug cited are included in the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®. Generics should be considered the first line of prescribing.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit. Pharmacy law requires a valid prescription for purchase of needles and syringes in certain states. OTC products are listed for informational purposes. If covered in the pharmacy benefit, OTC products require a valid prescription.

Drugs represented in the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® may have varying cost to the plan member. Prescription benefit plan may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lowest cost, brand-name medications on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® will generally cost more than generics, and brand-name medications not on the list will generally cost the most.
PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee’s voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee, but no CVS Caremark® employee may vote on issues before the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms are on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®, examples are noted below. The general principles shown in the examples can usually be extended to other entries in the book. Any exceptions are noted.

Products on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® include all strengths and dosage forms of the cited brand-name product.

- cefixime  
  *Suprax*

  Oral capsules, oral chewable tablets, oral suspension and all strengths of Suprax would be included in this listing.

When a strength or dosage form is specified, only the specified strength and dosage form is on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®. Other strengths/dosage forms of the reference product are not.

- tizanidine tabs  
  *Zanaflex*

  The tablets of Zanaflex are on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®. From this entry, the capsules cannot be assumed to be on the list unless there is a specific entry.

Extended-release and delayed-release products require their own entry.

- sitagliptin/metformin  
  *Janumet*

  The immediate-release product listing of Janumet alone would not include the extended-release product Janumet XR.

- sitagliptin/metformin ext-rel  
  *Janumet XR*

  A separate entry for Janumet XR confirms that the extended-release product is on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®.

Dosage forms on the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® will be consistent with the category and use where listed.

- nystatin

  The above nystatin entry listed in the TOPICAL/DERMATOLOGY section is limited to the topical dosage forms. From this entry the oral formulations cannot be assumed to be on the list unless there is an entry for this product in the ANTI-INFECTIVES section of the Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®.

GENERAL SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. Boldface type indicates generic availability. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In addition, boldface type may indicate that the brand name cited is a generic. Examples of the latter include Levoxyl and Trivora.

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

- levofloxacin
- moxifloxacin

### Penicillins
- amoxicillin
- amoxicillin/clavulanate (generic of AUGMENTIN)
- amoxicillin/clavulanate ext-rel
- ampicillin
- dicloxacillin
- penicillin VK

### Tetracyclines
- doxycycline hyclate (generic of VIBRAMYCIN)
- doxycycline hyclate 20 mg
- minocycline
- tetracycline

### ANTIFUNGALS
- clotrimazole troches
- fluconazole (generic of DIFLUCAN)
- griseofulvin ultramicrosize
- itraconazole
- nystatin
- terbinafine tabs
- voriconazole (generic of VFEND)

### ANTIMALARIALS
- atovaquone/proguanil (generic of MALARONE)
- chloroquine
- mefloquine

### ANTIRETROVIRAL AGENTS
#### Antiretroviral Combinations
- abacavir/dolutegravir/lamivudine (TRIUMEQ)
- abacavir/lamivudine (generic of EPZICOM)
- atazanavir/cobicistat (EVOTAZ)
- bictegravir/emtricitabine/tenofovir alafenamide (BIKTARVY)
- darunavir/cobicistat (PREZCOBIX)
- darunavir/cobicistat/emtricitabine/tenofovir alafenamide (SYMTUZA)
- dolutegravir/lamivudine (DOVATO)
- efavirenz/emtricitabine/tenofovir disoproxil fumarate
- efavirenz/lamivudine/tenofovir disoproxil fumarate
- elvitegravir/cobicistat/emtricitabine/tenofovir alafenamide (GENVOYA)
emtricitabine/rilpivirine/tenofovir alafenamide (ODEFSEY)
emtricitabine/tenofovir alafenamide (DESCOVY)
emtricitabine/tenofovir disoproxil fumarate
lamivudine/tenofovir disoproxil fumarate (CIMDUO)
lamivudine/zidovudine

**Fusion Inhibitors**
enfuvirtide (FUZEON)
maraviroc

**Integrase Inhibitors**
dolutegravir (TIVICAY)
raltegravir (ISENTRESS)

**Non-nucleoside Reverse Transcriptase Inhibitors**
efavirenz
etravirine (generic of INTELENCE)
nevirapine
nevirapine ext-rel
rilpivirine (EDURANT)

**Nucleoside Reverse Transcriptase Inhibitors**
abacavir
emtricitabine (generic of EMTRIVA)
lamivudine
stavudine
zidovudine (generic of RETROVIR)

**Nucleotide Reverse Transcriptase Inhibitors**
tenofovir disoproxil fumarate

**Protease Inhibitors**
atazanavir
darunavir (generic of PREZISTA)
lopinavir/ritonavir
ritonavir (generic of NORVIR)

**ANTITUBERCULAR AGENTS**
ethambutol (generic of MYAMBUTOL)
isoniazid
pyrazinamide
rifampin

**ANTIVIRALS**

**Cytomegalovirus Agents**
valganciclovir

**Hepatitis Agents**

Hepatitis B
entecavir tabs
lamivudine
tenofovir disoproxil fumarate
Hepatitis C

† ledipasvir/sofosbuvir (HARVONI)
  ribavirin
† sofosbuvir/velpatasvir (EPCLUSA)
† sofosbuvir/velpatasvir/voxilaprevir (VOSEVI)

† HARVONI only for genotypes 1, 4, 5, and 6
EPCLUSA for genotypes 1, 2, 3, 4, 5, 6
VOSEVI for use in patients previously treated with an HCV regimen containing an NS5A inhibitor
