

Why Weight Kentucky

We can help you with your weight loss journey

It's important to maintain a healthy weight. If you would like a little support to guide your weight loss or lifestyle choices, we are here for you. There is a dedicated, personalized support program available to help you reach your weight-loss goals: **Why Weight Kentucky**.

About Why Weight Kentucky

Why Weight Kentucky is a weight management program that can help you improve your health with the support and guidance of a dedicated nurse. This support is available at no extra cost to you as part of your Kentucky Employees' Health Plan (KEHP). If you participate in the program and your doctor prescribes weight-loss medicines, you can receive coverage according to your benefits.¹

How the program works

1. Begin by talking to a Personal Health Consultant (PHC) who is a registered nurse. The nurse will assess your health needs and give you more information about Why Weight Kentucky.
2. Your nurse can help you to enroll in the program.
3. You will work with your nurse to develop a weight management plan.

Once you are enrolled in the program, your dedicated nurse will:

- Discuss how weight loss can improve your health and lower your risk for other health problems, like diabetes.
- Team up with you to build a weight management plan that works for you and your doctor.
- Share weight-loss resources available to you online or near your home.
- Help you find ways to overcome challenges that you may face on your journey to meet your health goals.

Your personal health information will be kept strictly confidential. This program does not replace advice from your doctor. Always talk to your doctor about any health questions or concerns you may have.
