Experience you can trust.

For 15+ years, Patient-Centered Care pharmacists have helped BCBS FEP members manage their medications and improve their health.

About Patient-Centered Care

FEP Patient-Centered Care (PCare) is an established Medication Therapy Management (MTM) program that is accredited by URAC and meets the Drug Therapy Management Standards. We are committed to meeting the rigorous standards and providing you with a quality MTM service with each scheduled visit with your clinical pharmacist. PCare is a complimentary service available to all FEP members. Your clinical pharmacist is available to meet with you by phone or video conference to help you better understand your drug therapies, reduce side effects, improve drug therapy outcomes, and help you to reach drug therapy and lifestyle goals.
