

# GSK Zero Copay Prescription Drug List

This GSK Zero Copay Prescription Drug List highlights the prescription drugs that are covered at 100%\* under your GSK Pharmacy Benefit Program, administered by CVS Caremark®.

Over-the-counter products are not covered by the GSK Pharmacy Benefit Program.

This list is not all inclusive, is subject to change at any time and does not guarantee coverage. Certain indications of the GSK prescription products listed below may have been divested and are not eligible for the zero copay. Contact CVS Caremark to verify coverage.

To make sure your prescription is filled with the GSK drug prescribed by your physician, ask that the prescription be written in a no-substitution format by checking the “dispense as written” box at the bottom of the prescription.

Please check with CVS Caremark Customer Care for the most up-to-date information.

CVS Caremark Customer Care can be contacted at 1-888-739-7992.

\*Under the GSK High Deductible Health Plan (HDHP) option, members will pay 100% of the drug cost prior to the deductible being met (including GSK prescription products). After the deductible is met, these drugs will process at \$0 cost share. GSK drugs that are on the HDHP Preventive Drug List will bypass the deductible and pay at \$0 cost share. Please see the HDHP Preventive Drug List for drugs that are considered preventive. You can also contact Caremark Customer Care at 1-888-739-7992.

\*\*Indicates a GSK co-marketed product
