

Intuit

Intuit and CVS Caremark are always looking for ways to offer you more choices and help you save money on your prescriptions. Your plan is designed to help you and your employer maintain affordable prescription drug coverage, and save on prescription costs by encouraging the use of lower-cost generic drugs. Starting August 1, 2011, the following pharmacy plan changes will be implemented.

Brand Medications Requiring Use of a Generic First

You can save money by using safe, effective generic medications when possible. According to your prescription benefit plan, in order for certain brand-name medications to be covered, you will have to try a generic medication first. The chart below tells you which kinds of drugs require you to use a generic first. This chart only provides a sample list of generic drug options and may not include all drugs available.

Drug Class <i>Condition Treated*</i>	Step 1: You will have to try one of these generic medications first:	Step 2: Before you can try one of these brand-name drugs:
Antihistamines/Combinations <i>Allergies</i>	fexofenadine fexofenadine-pseudoephedrine 60 mg/120 mg levocetirizine	Allegra ODT Allegra-D 24 Hour Clarinet/Clarinet-D Xyzal Solution
