

MVP Health Care[®]

2023 Medicaid Formulary

(List of Covered Drugs)

Please Read: This document contains information about the drugs we cover in this plan.

This formulary is effective on **March 1, 2023**. For more recent information or other questions, please contact the MVP Member Services/Customer Care Center.

1-800-852-7826

(TTY: 1-800-662-1220)

Monday-Friday, 8 am - 6 pm Eastern Time

Visit **mvphealthcare.com** for the most up-to-date Formulary listing.

Your physician is the person best suited to help you make decisions about prescription drugs, and the prescription drug information below is intended for consumer guidance only. This information relates to the Prescription Drug Formulary, generally, and may not describe your specific coverage. Your Member Handbook determines your benefits, limitations and exclusions.

While every effort has been made to ensure accuracy, some information may be out of date. The Formulary is subject to change based on decisions made by the Pharmacy & Therapeutics (P&T) committee. New drugs are not covered until reviewed by the P&T committee. Medications with an over-the-counter equivalent are not a covered benefit. Drugs entering the market between 1938 and 1962 that were approved for safety but not effectiveness are called "DESI" drugs. DESI drugs are not covered on the Medicaid Formulary.

The information contained in the *MVP Health Care Medicaid Formulary* is provided by MVP Health Care® (MVP) solely for the convenience of medical providers. MVP does not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. The *MVP Health Care Medicaid Formulary* is not intended to be a substitute for the knowledge, expertise, skill, and judgement of the medical practitioner in his/her choice of prescription drugs. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands, and mandatory generics whenever applicable. MVP assumes no responsibility for the actions of any medical practitioner based upon reliance, in whole or part, on the information contained herein. The medical practitioner should consult the drug manufacturer's product literature or standard references for more detailed information.

Coverage is limited to a 30-day supply of medication at a participating retail pharmacy. The Plan may limit coverage to a specific quantity or a specific course of treatment. The Plan may also require prior authorization on some covered drugs. If you need more information about policies regarding a specific drug, consult your physician or contact the MVP Member Services/Customer Care Center. If the medication you take is not listed below, contact the CVS Caremark Customer Care Center at the phone number listed on your identification card.

Effective September 1, 2022, the New York State Department of Health is requiring that all pharmacy claims for managed care Medicaid members to be filled at pharmacy

enrolled in Fee For Service Medicaid as well as prescribed by a prescriber enrolled in Fee for Service Medicaid.

How Do I Use the Formulary?

There are two ways to find your drug within the Formulary:

Medical Condition

The drugs in this Formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular". If you know what your drug is used for, look for the category name in the document below. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index.

1. Look in the Index and find your drug.
2. Next to your drug, you will see the page number where you can find coverage information.

Are There Any Restrictions on My Coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

PRIOR AUTHORIZATION (PA)

MVP requires your physician to get prior authorization for certain drugs. This means that you will need to get approval from MVP before you fill your prescriptions. If you don't get approval, MVP may not cover the drug. Some drugs not listed on the formulary

document follow approved MVP prior authorization policies. Please note that all new drugs will be excluded from the formulary and require prior authorization until reviewed by the MVP Pharmacy and Therapeutics (P&T) Committee. The P&T Committee recommends drugs to be excluded from coverage if they do not have significant clinical and/or therapeutic advantages over drugs currently covered by the Plan. The Committee uses utilization, pharmaco-economic and clinical data to develop the exclusions. However, not every member may be able to tolerate formulary drugs due to clinical ineffectiveness or adverse/allergic reactions. Therefore, a formulary exception (prior authorization) process for these cases will allow members to receive otherwise non-covered medications.

QUANTITY LIMIT (QL)

Some drugs in the formulary have a maximum quantity that may be received over a specified time period. The list of drugs with quantity limits is subject to change and drugs with them are marked by a “**QL**”. The amount of drug covered is based on clinical considerations. If you require more than the allowed quantity, the prescribing practitioner should initiate a request for coverage.

STEP THERAPY (ST)

In some cases, MVP requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, MVP may not cover Drug B unless you try Drug A first. If Drug A does not work for you, MVP will then cover Drug B.

SPECIALTY DRUGS (SP)

Specialty medications are used in the management of complex chronic or genetic conditions and certain catastrophic diseases. They are most often injectable medications but may also include oral agents. Drugs identified in the formulary as “**SP**” must be filled through the CVS Specialty Pharmacy or another pharmacy in the specialty network.

OVER THE COUNTER MEDICATIONS (OTC)

Certain medications listed in the formulary are available over the counter. For these to be covered by insurance, a prescription is required.

MEDICAL (M)

These drugs are covered under your Medical benefit. Typically, these products are obtained and administered by your physician. If your provider is unable to obtain these medications, they must be obtained from CVS Specialty pharmacy, or another pharmacy in the specialty network.

AGE

Some medications have age restrictions to ensure they are used in appropriate age groups. If you are outside of the age restriction but require the use of a drug with an age edit, your practitioner can submit a request for coverage and tell us why you need this drug.

Statewide Formulary for Opioid Dependence Agents and Opioid Antagonists

Per the New York State Executive Budget for State Fiscal Year 2020-2021 and per Social Services Law, the Department of Health (DOH) is required to institute a single statewide outpatient formulary for Opioid Dependence Agents and Opioid Antagonists for both Medicaid Managed Care Plans and Fee-For-Service. Visit <https://newyork.fhsc.com/providers/mat.asp> for the NYS DOH Single Statewide Assisted Treatment link.

For More Information

For more detailed information about your MVP Health Care prescription drug coverage, please review your Member Handbook.

Please be advised that this document is updated periodically, and changes may appear prior to their effective date to allow for member notification.

If you have questions about MVP, please contact us. Our contact information, along with the date we last updated the Formulary, appears on the front cover page.

MVP Medicaid Effective 03/01/2023

Drug Name	Drug Tier	Requirements/Limits
