Specialty medications are in bold print. Non-Specialty medications are not bolded.

* Cialis 2.5mg and Cialis 5mg are a covered benefit with prior approval, **Cialis 10mg** and **Cialis 20mg** are NOT covered benefits under the plan.

** **Renova 0.02%** is NOT a covered benefit as its only FDA approved indication is for cosmetic use.

+These medications can be found under Topical Corticosteroids

++These medications can be found under Topical Antifungals and Antibiotics

The medicine names listed in this document are the registered and/or unregistered trademarks of third-party pharmaceutical companies.

These trademarks are included for informational purposes only and are not intended to imply or suggest any affiliation with such third-party companies.

Learn About Prior Approval

For certain prescription medicines, the Service Benefit Plan Pharmacy Programs must determine whether the medicine is related to a service or condition that is covered before benefits can be approved. We also evaluate whether the medicine is prescribed in accordance with generally accepted medical practices.

Federal Employee Program.

FEP Prior Approval Program

The prior approval program ensures members have access to appropriate quantities of medicine either by requiring prior approval of a medicine before benefits can be paid or by making available a set amount of medicine within a specific timeframe, known as a quantity allowance.

According to the terms of your coverage, prior approval is required for certain services and supplies and must be renewed periodically. This is outlined in the Blue Cross and Blue Shield Service Benefit Plan brochure (RI 71-005 or RI 71-017), your official statement of benefits.

For prescription drugs and covered medical supplies, prior approval is required if the medication

- may be used outside the Food & Drug Administration or manufacturer's guidelines;
- requires completion of diagnostic procedures to maximize the therapeutic benefits;
- may be used to treat conditions or illnesses not covered by the Plan;
- has unique dosing and/or administration requirements; or
- has a high potential for adverse effects and/or abuse.

How to Obtain Prior Approval

FEP Clinical Call Center

Your physician's office can contact our clinical call center toll-free at 1-877-727-3784 between the hours of 7 a.m. and 9 p.m., Eastern Time, Monday through Friday and request prior approval or quantity increases. This phone number is for physicians' offices only.

Paper-based Process

The Service Benefit Plan recognizes some members and physicians prefer to use a paper-based process to obtain prior approval. You or your physician can request the appropriate form by calling the Retail Pharmacy Program Customer Care Unit toll-free at 1-800-624-5060 or printing the form from www.FEPBlue.org/forms. Scroll down to Prior Approval Pharmacy Forms box and click on the link. Then scroll down on the Prior Approval Page to select the form for your specific medication.

Fax or mail the completed request to the number or address in the upper right-hand corner of the form. Please allow up to five business days for processing.

Prior Approval Status

You can verify the status of your prior approval request by logging on to our secure Web site. Follow the instructions above to access Caremark's Pharmacy Site. Once you have registered and logged in, select the **Plan and Benefits** tab, then **Coverage exceptions** on the left-side navigation bar. Please allow up to 24 hours for physician phoned-in requests or two to five business days for paper-based requests.
