In 2018, *OneTouch*™ lancets and test strips will remain the only preferred brands on the CVS Caremark® formulary that the State Group Insurance Program uses. Benefits of using *OneTouch*™ test strips and lancets:

- Lower copays or coinsurance than those associated with non-preferred brands
- Ability once every 365 days to call 1-800-588-4456 to request a new *OneTouch*™ blood glucose meter.
- You may want to consider the new *OneTouch Verio Flex*™ meter which allows you to wirelessly sync your results to your phone, once you have downloaded the free *OneTouch Reveal*® mobile app. The *OneTouch Reveal*® mobile app provides many benefits-
    - Results can be tagged as before or after meals
    - Patterns and graphs are automatically charted for your use
    - Graphs can be viewed by time of day to allow for easy understanding of high/low patterns
    - Can be seamlessly exported via PDF and sent via email to your physician

*A free OneTouch glucose meter is provided by the manufacturer, LifeScan Inc. and is not a state group insurance program benefit. Subject to change or discontinuation at any time. In order to receive a free monitor, the manufacturer may require the plan member to first fill a 90 day supply of OneTouch test strips through mail order.
