Category Drug Class	Other Considerations
All Drugs	On a quarterly basis, new and existing products - including limited source generics, products with significant cost inflation, and specialty and non-specialty products - may be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options remain available on the formulary and may result in removal, addition or deletion of a product.
Atopic Dermatitis †	As new atopic dermatitis products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options are available on the formulary and may result in removal, addition or deletion of a product on the first day of any calendar month.
Autoimmune and Hepatitis C †	For some clients, an Indication-Based Formulary will be utilized for products in these classes and may result in additional removals for certain conditions only.
Drugs for Infusion Into Spaces Other Than the Blood	A drug that must be infused into a space other than the blood will generally not be covered under the prescription drug benefit.
New-to-Market Agents <sup>1</sup>	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.

The listed formulary options are subject to change.

- † This list indicates the common uses for which the drug is prescribed. Some drugs are prescribed for more than one condition.
- \* Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.
- \*\* Listing does not include certain NDCs\*.
- 1 An exception process may exist for specific clinical or regulatory circumstances that may require coverage of a non-covered medication. If your doctor believes you have a specific clinical need for a non-covered product, they should fax an exception request to: 1-888-487-9257.
- 2 For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).
- 3 QVAR REDIHALER covered for members 5 years of age and under.
- 4 If approved for coverage and prescribed for primary prevention of cardiovascular disease, may be covered without cost sharing through an exceptions process.
- 5 Rebranded or private label formulations are not covered (i.e., RELION).
- 6 Long Acting Insulins - First Generation.
- 7 BD ULTRAFINE syringes and needles are the only preferred options.
- 8 An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK or ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.
- 9 ACCU-CHEK or ONETOUCH brand test strips are the only preferred options.
- 10 Generic multivitamins (except *Activite*, *Dexifol*, *Folvite-D*, *Genicin Vita-S*, *HylaVite*, *Multipro*, *TronVite*, *Vitasure*, *Xvite*) are the only preferred options.
- 11 Generic prenatal vitamins are the only preferred options.
