# 2023 EMPIRE PLAN FLEXIBLE FORMULARY PREFERRED DRUG LIST

Administered by CVS Caremark®

The **Empire Plan Flexible Formulary Preferred Drug List** is a guide within select therapeutic categories for enrollees and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name drug to treat a condition. These preferred brand-name drugs are listed to help identify products that are clinically appropriate and cost-effective. This is not an all-inclusive list. This list includes commonly prescribed covered drugs by therapeutic class, a list of commonly prescribed covered drugs in alphabetic order (Quick Reference Drug List), a list of commonly prescribed non-preferred (Level 3) drugs along with covered preferred drug alternatives, and a list of excluded drugs along with covered preferred drug alternatives. This list represents brand products in CAPS and generic products in lowercase *italics*.

Generally generics are subject to a Level 1 copayment<sup>1</sup>, or the lowest copayment; preferred brand drugs are subject to a Level 2 copayment, and non-preferred brand drugs are subject to a Level 3 copayment, or the highest copayment. Refer to your plan materials for specific information regarding copayment amounts.

## ENROLLEE

Your benefit plan provides you with prescription drug coverage administered by CVS Caremark. Ask your doctor to consider prescribing, when medically appropriate, a preferred generic or a preferred brand-name drug from this list. Take this list the next time you or a covered family member sees a doctor.

### Please note:

- You will be responsible for the full cost of non-formulary medications and products that are excluded from coverage unless a request for a medical exception is approved. New prescription drug products may be subject to exclusion upon release to the market.
- For specific information regarding your prescription benefit coverage and copay information, please visit <https://www.empireplanrxprogram.com> or call 1-877-7-NYSHIP (1-877-769-7447) and select option 4 for the Empire Plan Prescription Drug Program.
- When a generic medication that is equivalent to a brand-name drug is released to the market, in most instances, that brand-name drug will be designated as a non-preferred product. In this case, use of a non-preferred product will result in you paying the applicable non-preferred copayment plus the difference in cost between the brand-name drug and the generic, not to exceed the full retail cost of the drug (Ancillary Charge).

## HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan administered by CVS Caremark. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name drug is necessary, consider prescribing a brand-name drug on this list.

### Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage.
- The enrollee's prescription benefit plan may have a different copay for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Log in to <https://www.empireplanrxprogram.com> to check coverage and copay information for a specific medicine.

Also excluded from coverage: Drugs that are only FDA approved for cosmetic indications are excluded from the plan and are not eligible for a medical exception. Examples include, but are not limited to: Botox Cosmetic, hydroquinone-containing products, Latisse, Propecia, Renova and Vaniqua.

You will be responsible for the full cost of non-formulary medications and products that are excluded from coverage unless a request for a medical exception is approved. Information on the medical exception process can be found below in the For Your Information section.

**FOR YOUR INFORMATION: Generics should be considered the first line of prescribing.** This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. Any brand-name drug for which a generic becomes available may be designated as a non-preferred drug. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay for specific drugs on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand-name drugs in CAPS and generic drugs in lowercase *italics*. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Log in to <https://www.empireplanrxprogram.com> to check coverage and copay information for a specific medicine.

**The Flexible Formulary Preferred Drug List has an additional feature called Brand for Generic (B4G)** which saves you money on certain Brand-Name drugs that have a new generic available. When advantageous to the Plan, this feature allows a Brand-Name drug to be placed on Level 1, the lowest copayment level, and the new generic equivalent to be placed on Level 3, the highest copayment level or excluded. These placements are for a limited time, typically six months, and may be revised mid-year when such changes are advantageous to The Empire Plan. You will be notified when B4G savings are available. We will also notify your pharmacist so that the lowest cost option will always be dispensed. Please refer to the Empire Plan Prescription Drug Program website at <https://www.empireplanrxprogram.com> for the most current information regarding the B4G feature.

The Empire Plan has implemented a medical exception process for prescription drugs that are excluded from the Flexible Formulary Preferred Drug List. Enrollees and their physicians must first evaluate whether covered drugs on the Flexible Formulary Preferred Drug List are appropriate alternatives. After an appropriate trial of formulary alternatives, an enrollee's physician may submit a letter of medical necessity to CVS Caremark which details the enrollee's formulary alternative trials and any other clinical documentation supporting medical necessity. The physician can fax the exception request to 1-888-487-9257. If an exception is approved, the Level 1 copay will apply for generic drugs and the Level 3 copay (and ancillary charge, if applicable) will apply for brand-name drugs.
