

# Save with generics.

There are many generic options to help keep your medication as affordable as possible. Generic options can be safe and effective for your condition and can help lower your costs.

## Here's how to save with generics.

**Current prescriptions:** Ask your provider or pharmacist if you can replace your brand-name medication with a generic.

**New prescriptions:** Ask your provider if there's a generic option. Depending on the days' supply of your prescription, Standard, Premier or Limited PPO members pay between \$7-\$28 (or less) for most generics.

**Nearly nine out of 10** CVS Caremark® prescriptions are for generics.<sup>1</sup>
